

## SEQUENCE LIST

[page 1 of sequence list]

<110> National Center for Scientific Research

<120> Method for the inducible expression of RNAi in cells, the nucleic acid molecules for its implementation and the cells transformed by these molecules

<223> Primer sense used for obtaining the promoter H1 in PCR 33

<223> Primer antisense for obtaining the promoter H1 in PCR 38

<223> siRNA sense 31

<223> siRNA complementary sense 30

[page 2 of sequence list]

<223> siRNA antisense 43

<223> siRNA complementary antisense 35

<223> siRNA complementary 60

<223> Marked probe directed against the antisense strand of the siRNAs 35

[page 3 of sequence list]

<223> siRNA antisense 44

<223> > siRNA sense 20

<223> > siRNA antisense 24
